CONTENTS

Preface xvii
Foreword xix

1. An Overview of Writing and Publishing in the Health Sciences 1

Part I: How to Write in the Health Sciences

2. How to Write Effectively: Making Reading Easier 29
3. How to Write Efficiently: Making Writing Easier 50
4. How to Display Data in Tables and Graphs 67
5. How to Write an Abstract 101
6. How to Write a Grant Proposal 118
7. How to Write a Journal Article Reporting Original Research 139

Part II: How to Publish in the Health Sciences

8. Ethics in Research and Publishing 177
9. How to Prepare Drawings and Photographs for Publication 206
10. How to Document Biomedical Images for Publication 229
11. How to Publish in a Scientific Journal 261

Part III: How to Present in the Health Sciences

12. How to Prepare and Present a Scientific Poster 289
13. How to Prepare and Present Slides 313

Appendix: The Value of Systematic Reviews as Research Activities in Medical Education 349

Index 361

About the Author 387
1. An Overview of Writing and Publishing in the Health Sciences

   A Brief History of Scientific Publications  
   The First Scientific Journals  
   The Development of the Scientific Article  
   The Beginnings of Organized Biomedical Writing and Publishing  
   Advances in Scientific Reporting and Documentation

   Types of Scientific Articles  
   Observational Articles  
   Theoretical Articles  
   Experimental Articles  
   Methodological Articles  
   Review Articles  
   Other Forms of Communication in Journals

   Types of Journals

   Electronic Publications  
   Online Journals  
   Preprint Servers  
   Open-Access Publishing  
   Self-Archiving

   Books

   The Future

Part I: How to Write in the Health Sciences

2. How to Write Effectively: Making Reading Easier

   Moving from Practice Writing to Applied Writing

   Qualities of Effective Writing

   Attending to Your Readers

   Attending to Your Subject

   How to Make Your Writing Effective  
   Use Effective Words  
   Construct Effective Sentences  
   Write Effective Paragraphs  
   Subdivide the Text Purposefully

   A Note about Readability Formulas

3. How to Write Efficiently: Making Writing Easier

   Preparing to Write

   The Process of Writing  
   Stage 1: Planning the Text  
   Stage 2: Drafting the Text
Expanded Contents

Stage 3: Revising the Text 61
Stage 4: Polishing the Text 63

Collaborative Writing 65

4. How to Display Data in Tables and Graphs 67

Common Components of Tables and Graphs 68

Choosing between Tabular and Graphic Displays 69
  What Level of Detail Do You Want to Show? 69
  Do You Want to Help Readers Analyze or Reference Information? 71
  Do You Want to Show Exact Values or Patterns in the Values? 74

General Principles for Displaying Data 77

Tables and How to Design Them 80
  Parts of a Table 80
  Principles of Table Design 81

Graphs and How to Design Them 86
  Types of Graphs 87
  Parts of a Graph 90
  Principles of Graph Design 91

Specific Applications of Tables and Graphs 95

5. How to Write an Abstract 101

The Purpose of Abstracts 102
The Problems of Abstracts 103
Publication Abstracts 105
Meeting Abstracts 107
Steps in Writing Abstracts 111
Ways to Reduce Word Counts 111

6. How to Write a Grant Proposal 118

An Overview of the Grant Proposal Process 119
  Funding Agencies 120
  Grants and Contracts Offices 121

Types of Grant Proposals 122
  Research Grant Proposals 122
  Service Delivery Proposals 123
  Grants to Individuals 123

Developing a Grant Proposal 124
  Evaluating Your Idea 124
  Writing a Concept Paper 125
  Finding a Potential Funding Source 125
  How to Read Guidelines and Program Announcements 126
  Writing the Proposal 127
### Expanded Contents

- Preparing the Budget 131
- Submitting the Proposal 132

**Characteristics of Successful and Unsuccessful Proposals** 133

**Industry-Sponsored Research** 136

#### 7. How to Write a Journal Article Reporting Original Research 139

- **Getting Oriented** 140
- **Preparing the Title Page** 141
- **Writing the Title** 143
- **Writing the Abstract** 147
- **Key Words and Abbreviations** 148
- **Writing the Introduction** 148
- **Writing the Methods Section** 150
  - General Information on Experimental Methods 151
  - General Information on Measurements 152
  - General Information on Statistical Methods 154
  - Features of Basic Research Articles 155
  - Features of Clinical Research Articles 157
- **Writing the Results Section** 158
  - Supplemental Data 160
- **Writing the Discussion Section** 161
- **Writing the Acknowledgments** 163
- **Citing and Organizing References** 163
  - What Should Be Referenced 163
  - Where to Place Reference Citations 164
  - How to Prepare the Reference List 164
  - Reference Management Software 167
- **Organizing Tables and Figures** 168
  - Tables 169
  - Charts, Graphs, Drawings, and Illustrations 169
  - Photographs 170
  - Clinical and Laboratory Images 170
- **Presenting Equations** 170

#### Part II: How to Publish in the Health Sciences 175

#### 8. Ethics in Research and Publishing 177

**Ethics in Conducting Research** 177

- Protecting Human Subjects 177
- Assuring Patient Privacy 178
- Protecting Animal Subjects 180
Registering Clinical Trials 181
Making Research Results Publicly Available 183

Scientific Misconduct 184
Fabricating Data 185
Falsifying Data 186
Fraud 186

Ethics in Writing 187
Authorship 187
Variations of Authorship 188
Plagiarism and Copyright Violations 191

Ethics in Publishing 193
Suppressing Research Findings 193
Duplicate and Redundant Publication 193
Divided Publication: “Salami Science” 196
Confidentiality of Editors and Reviewers 197
Conflicts of Interests 197
Ethical Gray Areas: “Framing” and “Spinning” 200

9. How to Prepare Drawings and Photographs for Publication 206
Planning Drawings and Photographs 207
Types and Functions of Images 207
Subjects and Backgrounds of Images 208
Contrast between Subject and Background 209
Image Resolution 210
Image Size 212
Image Captions 213

Preparing Drawings: “Line Art” 213
Preparing Photographs and “Continuous-Tone” Art 214

Submitting Digital Images for Publication 216
Graphic Formats 218
Color Models 220
Color Depth 222
File Naming Conventions 223
Image Compression 224
Image Manipulation 224

Submitting Print Images for Publication 225

Submitting Audio and Video Clips 227

10. How to Document Biomedical Images for Publication 229
Components of Image Documentation 230
Image Enhancement and Modification 231
## Expanded Contents

**Implications of Diagnostic Images**
- 232

**Characteristics of Clinical Images**
- Characteristics of the Subject: 234
- Characteristics of Image Acquisition: 234
- Characteristics of the Image: 235
- Interpretation of the Image: 235

**Guidelines for Documenting Clinical Images**
- Clinical Photographs: 236
- Plain Radiographs: 238
- Fluoroscopic Images: 240
- Sonograms: 241
- CAT Scans: 242
- MRI Scans: 243
- Radionuclide Images: 245
- Electrocardiograms: 247
- Electroencephalograms: 248

**Characteristics of Laboratory Images**
- Characteristics of the Subject: 251
- Characteristics of Image Acquisition: 252
- Characteristics of the Image: 252
- Interpretation of the Image: 252

**Guidelines for Documenting Laboratory Images**
- Micrographs: 253
- Gels and Blots: 255
- Genetic Sequence Information: 258

### 11. How to Publish in a Scientific Journal

**Characteristics of Scientific Journals**
- Business Aspects of Scientific Journals: 262
- Rankings of Scientific Journals: 263

**Beginning the Publication Process**
- Choosing a Journal: 267
- Preparing Your Manuscript: 268

**Submitting Your Manuscript**
- The Cover Letter: 270
- Submitting a Manuscript Online: 271
- Submitting a Manuscript by Mail: 273

**The Peer Review Process**

**The Editor’s Decision**
- The Initial Decision and Peer Review Comments: 275
- The Final Decision: 276
## Expanded Contents

**The Production Process**
- 279

**After Publication**
- Requirements for Articles Reporting NIH-Funded Research 280
- Following Up: Who Cited Your Article? 281

**A Note for Non-Native English Speakers**
- 282

### Part III: How to Present in the Health Sciences

**12. How to Prepare and Present a Scientific Poster**
- 289

**An Overview of Poster Displays**
- 290
  - The Call for Abstracts 290
  - Human Factors in Poster Viewing 290

**Preparing the Poster**
- 292
  - Scheduling and Planning 292
  - Writing the Text 293
  - Preparing the Illustrations 297
  - Format and Construction 299
  - Designing the Layout 300
  - Choosing Type Fonts and Sizes 301
  - Using Color 309
  - Other Considerations 309

**What to Do at the Conference**
- 310
  - Setting up the Poster 310
  - Presenting the Poster 310
  - Removing the Poster 311

**13. How to Prepare and Present Slides**
- 313

**Communicating with Slides**
- 314

**Designing Slides**
- 315
  - Presentation Software Programs 315
  - Slide Formats 315
  - Choosing Type Fonts and Sizes 316
  - Formatting the Text 317
  - Using Color 322
  - Other Considerations 324

**Preparing Images**
- 326

**Visual and Audio Effects**
- 330

**Organizing and Writing the Text**
- 333

**Software Considerations**
- 336

**Hardware Considerations**
- 340

**Delivering Your Lecture**
- 340
  - Your Spoken Presentation 340
Expanded Contents

Handouts: Your Written Presentation 341
Other Considerations 345

Appendix: The Value of Systematic Reviews as Research Activities in Medical Education 349
