PART I: THE SPECIALTY OF HOSPITAL MEDICINE AND SYSTEMS OF CARE

SECTION 1 The Value and Values of Hospital Medicine

1 The Face of Health Care: Emerging Issues for Hospitalists ................ 5
2 Value-Based Health Care for Hospitalists ........................................... 10
3 Racial/Ethnic Disparities in Hospital Care ............................................. 18
4 Comanagement of Orthopedic Patients ................................................. 23
5 Professionalism in Hospital Medicine .................................................... 29
6 Principles of Leadership ......................................................................... 33

SECTION 2 Critical Decision Making at the Point of Care

7 Principles of Evidence-Based Medicine and Quality of Evidence .......... 39
8 Diagnostic Reasoning and Decision Making .......................................... 45
9 Principles of Evidence-Based Prescribing .............................................. 56
10 Summary Literature: Practice Guidelines and Systematic Reviews ........ 62
11 Practical Considerations of Incorporating Evidence into Clinical Practice 70

SECTION 3 Transitions of Care

12 Care Transitions into the Hospital: Health Care Centers, Emergency Department, Outside Hospital Transfers ......................... 79
13 Care Transitions within the Hospital: The Hand-Off ............................ 84
14 Care Transitions at Hospital Discharge .................................................. 90

SECTION 4 Patient Safety and Quality Improvement

15 Principles of Patient Safety: Intentional Design and Culture .................. 99
16 Patient-Centered Care .......................................................................... 104
17 Harnessing Data to Make Quality Improvement Decisions: Measurement and Measures .......................................................... 110

SECTION 5 Practice Management

23 Building, Growing and Managing a Hospitalist Practice ................... 139
24 Best Practices in Physician Recruitment and Retention ..................... 150
25 Teamwork in Leadership and Practice-Based Management ............... 157
26 Negotiation and Conflict Resolution ....................................................... 164

SECTION 6 Billing, Coding, and Clinical Documentation

27 Professional Coding and Billing Guidelines for Clinical Documentation .... 173
28 Consultation, Comanagement, Time-Based, and Palliative Care Billing .. 182
29 Billing for Procedures and Use of Modifiers in Inpatient Practice .......... 192
30 Billing in the Teaching Setting and Billing with Advanced Practice Providers 198
31 Hospital-Driven Documentation ............................................................... 204
32 Taming the ICD-10 Monster ................................................................. 210

SECTION 7 Principles of Medical Ethics and Medical-Legal Concepts

33 Common Indications for Ethics Consultation ....................................... 217
34 Medical-Legal Concepts: Advance Directives and Surrogate Decision Making .............................................................. 224
35 Medical Malpractice .............................................................................. 231

SECTION 8 Professional Development

36 Principles of Adult Learning and Continuing Medical Education .......... 243
37 Cultural Competence .......................................................................... 246
38 Career Design and Development in Academic and Community Settings 253
39 Mentorship of Peers and Trainees .......................................................... 257
40 Research in the Hospital ....................................................................... 264
## PART II: MEDICAL CONSULTATION

### SECTION 1: Surgery

PART V: DIAGNOSTIC TESTING AND PROCEDURES

SECTION 1 Interpretation of Common Tests
- Basic Diagnostic Tests ........................................ 771
- The Resting Electrocardiogram ................................ 776
- Elevated Liver Biochemical and Function Tests ........ 796
- Pulmonary Function Testing .................................. 805
- Urinalysis and Urine Electrolytes ............................ 814

SECTION 2 Radiology
- Introduction to Radiology ..................................... 825
- Patient Safety Issues in Radiology ............................ 831
- Basic Chest Radiography (CXR) .............................. 838
- Advanced Cardiothoracic Imaging ......................... 853
- Basic Abdominal Imaging ..................................... 864
- Advanced Abdominal Imaging ............................... 870
- Neurologic Imaging ........................................... 876
- Interventional Radiology ...................................... 884

SECTION 3 Procedures
- Vascular Access .................................................. 891
- Intubation and Airway Support ............................... 895
- Arterial Blood Gas and Placement of A-line ............ 901
- Feeding Tube Placement ....................................... 905
- Thoracentesis ..................................................... 909
- Lumbar Puncture ............................................... 914
- Paracentesis ....................................................... 918
- Arthrocentesis .................................................... 921

PART VI: CLINICAL CONDITIONS IN THE INPATIENT SETTING

SECTION 1 Cardiovascular Medicine
- Acute Coronary Syndromes .................................. 929
- Heart Failure ...................................................... 941
- Myocarditis, Pericardial Disease, and Cardiac Tamponade .................................. 954
- Valvular Heart Disease ......................................... 965
- Supraventricular Tachyarrhythmias ......................... 980
- Bradycardia ......................................................... 996
- Ventricular Arrhythmias ....................................... 1003
- Cardioversion .................................................... 1015
- Pacemakers, Defibrillators, and Cardiac Resynchronization Devices in Hospital Medicine .................................. 1025

SECTION 2 Critical Care
- Inpatient Cardiac Arrest and Cardiopulmonary Resuscitation .............................. 1037
- Acute Respiratory Failure ..................................... 1047
- Pain, Agitation and Delirium in the Critical Care Setting ............................................ 1055
- Mechanical Ventilation ....................................... 1065
- Sepsis and Shock ................................................. 1074
- Acute Respiratory Distress Syndrome .................. 1085
- Prevention in the Intensive Care Unit Setting .......... 1094

SECTION 3 Dermatology
- Flushing and Urticaria .......................................... 1105
- Adverse Cutaneous Drug Reactions ...................... 1114
- Psoriasis and Other Papulosquamous Disorders ...... 1125
- Diabetic Foot Infections ...................................... 1131
- Venous Ulcers .................................................... 1138
- Dermatologic Findings in Systemic Disease .......... 1145

SECTION 4 Endocrinology
- Glycemic Emergencies ........................................ 1171
- Inpatient Management of Diabetes and Hyperglycemia .............................................. 1178
- Thyroid Emergencies ......................................... 1184
- Adrenal Insufficiency ......................................... 1191
- Pituitary Disease .................................................. 1198

SECTION 5 Gastroenterology
- GERD and Esophagitis ........................................ 1209
- Upper Gastrointestinal Bleeding ............................ 1217
- Acute Pancreatitis ................................................. 1227
- Jaundice, Obstruction, and Acute Cholangitis .......... 1232
- Acute Liver Disease ............................................ 1239
- Cirrhosis and Its Complications ............................ 1253
- Acute Lower Gastrointestinal Bleeding ......... 1269
- Small Bowel Disorders ........................................ 1279
- Large Bowel Disorders ........................................ 1290
- Inflammatory Bowel Disease ............................... 1308

SECTION 6 Geriatrics
- Principles of Geriatric Care .................................. 1323
- Agitation in Older Adults ..................................... 1330
- Elder Mistreatment .............................................. 1336
- Malnutrition and Weight Loss in Hospitalized Older Adults ........................................ 1346
CONTENTS

SECTION 7 Hematology
169 Abnormalities in Red Blood Cells 1353
170 Disorders of the White Cell 1373
171 Quantitative Abnormalities of Platelets: Thrombocytopenia and Thrombocytopsis 1381
172 Approach to Patients with Bleeding Disorders 1392
173 Hypercoagulable States 1399
174 Hematologic Malignancies 1405

SECTION 8 Oncology
175 Overview of Cancer and Treatment 1431
176 Oncologic Emergencies 1436
177 Approach to the Patient with Suspected Malignancy 1443
178 Breast, Ovary, and Cervical Cancer 1454
179 Men's Cancers 1458
180 Cancers of the Kidney, Renal Pelvis, and Ureter 1463
181 Oncologic Issues of the Aerodigestive Tract 1468
182 Gastrointestinal Cancers 1474
183 Immune-Related Adverse Events (irAEs) in Cancer Patients 1477

SECTION 9 Infectious Disease
184 Fundamentals of Antibiotics 1489
185 Antibiotic Resistance 1498
186 Community-Acquired Pneumonia 1503
187 Health Care and Hospital-Acquired Pneumonia 1514
188 Intravascular Catheter-Related Infections: Management and Prevention 1519
189 Infective Endocarditis 1528
190 Clostridium difficile-Associated Disease (CDAD) 1537
191 Peritonitis and Intra-Abdominal Abscess 1542
192 Meningitis and Encephalitis 1549
193 Osteomyelitis and Septic Arthritis 1557
194 Prosthetic Joint Infections 1564
195 Sexually Transmitted Infections 1574
196 Skin and Soft Tissue Infections 1582
197 Urinary Tract Infections 1589
198 Viral Infections 1596
199 Tickborne Infections 1604
200 Tuberculosis 1612
201 Candida and Aspergillus 1618
202 Histoplasmosis, Blastomycosis, Coccidioidomycosis, and Other Dimorphic Fungi 1625
203 The Hospitalized Patient with HIV 1634
204 Infections of the Immunocompromised Host 1646
205 Fever in the Returning Traveler 1653
206 Undiagnosed Fever in Hospitalized Patients 1659

SECTION 10 Neurology
207 Coma and Disorders of Consciousness 1667
208 Intracranial Hemorrhage and Related Conditions 1674
209 Transient Ischemic Attack and Stroke 1681
210 Parkinson's Disease and Related Disorders 1690
211 Seizures 1700
212 Multiple Sclerosis 1712
213 Peripheral Neuropathy 1719

SECTION 11 Palliative Care
214 Principles of Palliative Care 1727
215 Communication Skills for End-of-Life Care 1733
216 Domains of Care: Physical Aspects of Care 1740
217 Care of the Dying Patient 1756

SECTION 12 Pregnancy
218 Overview of Physiologic Changes of Pregnancy 1767
219 Medication Management 1771
220 Critical Care of the Pregnant Patient 1781
221 Common Medical Problems in Pregnancy 1786
222 Postpartum Consultation for Common Complaints 1807

SECTION 13 Psychiatry
223 Mood and Anxiety Disorders 1813
224 Combat Stress and Related Disorders 1827
225 Assessment and Management of Psychosis 1833
226 Eating Disorders 1841
227 The Suicidal Patient 1848
228 The Difficult Patient 1853
229 Approach to the Patient with Multiple Unexplained Somatic Symptoms 1861

SECTION 14 Pulmonary and Allergy Immunology
230 Allergy and Anaphylaxis 1871
231 Asthma 1876
232 Chronic Obstructive Pulmonary Disease 1887
233 Interstitial Lung Diseases/Diffuse Parenchymal Lung Diseases 1898
234 Cystic Fibrosis 1905
235 Sleep Apnea and Obesity Hypoventilation Syndrome 1915
236 Pleural Diseases 1923
237 Pulmonary Hypertension 1932

SECTION 15 Renal
238 Acid-Base Disorders 1943
239 Acute Kidney Injury 1952
240 Calcium Disorders 1961
CONTENTS

SECTION18  Vascular Medicine

252 Venous Thromboembolism Prophylaxis for Hospitalized Medical Patients ........................................... 2077
253 Diagnosis and Treatment of Venous Thromboembolism ............................................................................. 2081
254 Anticoagulant Therapy ............................................................................................................................... 2093
255 Diseases of the Aorta .................................................................................................................................... 2107
256 Acute and Chronic Lower Limb Ischemia ...................................................................................................... 2115
257 Vasculitis ..................................................................................................................................................... 2121

Online Chapters

e1 Global Health and Hospital Medicine
e2 The Economics of Hospital Care
e3 Principles of Medical Ethics
e4 The Core Competencies in Hospital Medicine
e5 Bioterrorism
